

## Hudson Community Power

Many New Hampshire cities and towns have launched Community Power programs, establishing a new, locally controlled option for default electricity supply service.

In enacting Community Power (RSA 53-E) the NH General Court aims to allow communities to lower electric costs and adopt voluntary, cost effective and innovative solutions to local needs with careful consideration of local conditions and opportunities.

Hudson has joined the Community Power Coalition of New Hampshire, a nonprofit power agency created by New Hampshire municipalities and counties. For information on **Hudson Community Power**, its benefits, and how to join, please visit:
